Testimonials

Employee 1

Education: Level 8 in Sustainable Electrical Power Systems

First position held at SL Controls: Graduate Validation Engineer

'My course contained a lot of content that is relevant for my work duties as a Validation Engineer because I work with Control Engineers and other Engineers on a daily basis'.

Current position: Systems Validation Engineer

'Work time is split between onsite projects with customers and working in the SL Controls office. I have been involved in a number of projects including the validation of in-house applications and the UDI upgrade of production lines in Medical Device companies'.

Why SL Controls?

'As a graduate I have gained great experience as a Validation Engineer by working as an individual and also as part of a team on different projects. There are opportunities to grow within the company and promotion within the company is encouraged'.

Employee 2

Education: Level 8 in BEng Automation and Controls LIT and BSc Electronic Systems

'My degree gave me confidence that I could work across a variety of platforms and be able to design, create and talk about software projects competently within an engineering environment. There isn't one day that I do not use something that I learned in college'.

Current position: Project Manager

Previous positions held at SL Controls: Control Systems Engineer

'I joined the Company in 2012 after completing a level 8 degree in Electronic Systems in LIT, Limerick. After spending 3 months in Sligo and Galway working on standalone projects, I joined the SL Controls Limerick team working in a Medical Device Manufacturing Facility. My roles were installing and commissioning software'.

'I moved into lead roles for SL Controls running projects for a medical device company and became SL Controls on site Lead. Since then, I have progressed to project manager for SL Controls in the Limerick Office, rolling out projects and managing a team of 15 engineers'.

Advice for students?

'Learn how to document your work from a design perspective and discuss your design with the right people at every opportunity'.
