

Company: Consumer Electronics
Service: Factory Automation Solutions
Sector: Consumer Electronics – 10000 + employees

Customer Duration: 15 Years
Project Value: \$4.35M

Project Overview: Asset Transfer Program of six high volume manufacturing lines & three packaging lines to multiple sites across Asia

Strategic Targets:

- Plan the schedule, cost and resource requirements to support the strategic cost-saving program.
- Complete all required procurements to engage external partners.
- Manage all related Air Charter, Sea & Road logistics from site to site.
- Protect retained production capability at source sites from all risks during equipment power down, dis-assembly, crating and logistics stages.
- Support specified activities at the landing site (logistics, un-crating, assembly, debug & validation).
- Ensure full adherence to Safety Requirements (construction safety & corporate EHS).

Outcomes Achieved:

- Completed all budget & procurement activities to support the strategic cost-saving program.
- Built & onboarded cross functional teams from internal & partner organisations to deliver on scope.
- On-site supervision of all activities in Ireland to execute on full scope (power-down, disassembly, export crating & logistics).
- Successfully transferred 8 Production Lines & 5 Packaging Lines during the assigned 2 year window.
- Manage change throughout the process whilst delivering on budget commitments.
- Managed country-specific customs processes and documentation to deliver on schedule.
- Supported installation & validation efforts on site in Asia as required.
- Managed the backup & transfer of all software and documentation to support the seamless start-up and production ramp in Asia.

Factory Automation program managed the safe transfer and successful start-up of equipment from Ireland to Asia
